## Sand Bottles

With the recent moisture that has entered into The Harvest ecosystem, this had lead to a turf state that is more susceptible to deeper divots. We have noticed that the some of sand bottles on either pull carts or power carts are returning unused.

We respectfully ask for your help in joining the already diligent group of members, in maintaining the golf course by using the sand mix (mulch, sand, and seed combination) by refilling divots on tees, fairways and approach zones, which is a strain of bent grass, while not in the rough or the collar around the greens as this is a different strain of grass (blue grass). Divots when replaced or filled will germinate in a matter of days. Thank you once more for your support in assisting us in maintaining the golf course!
