Course Condition Update:

The Spring aeration program is now complete, this includes solid-tine aeration and top dressing of greens. Additionally, hollow core aeration and top dressing of all approach/front of green areas also took place. Thank you for your understanding as aeration is needed to ensure quality course conditions in the future.

Please be aware that the 3rd edition of the irrigation installation newsletter will be sent to you on May 8th

Get Fit Today: Taylormade Performance Center

The Taylormade Performance Centre is booking for the golf season! To book your Taylormade Fitting with master fitter Shea McLaughlin call the proshop <u>to book</u> or click below to book online.

What is 10K MOI?

When getting fit for a driver one option is the Qi10 Max which features a shallower head shape that significantly increases inertia by allowing mass to be placed further away from the center of the clubhead.

When Taylormade says Qi10 Max boasts 10K moment of inertia (MOI), it is referring to the measure of an object's resistance to change in its rotation. As most of us are golfers and not physicists, this design is all about stability and forgiveness at impact. Come feel this increased stability by booking now!
