**October 10th, 11th &  
12th Closures**

On October 10th, The Harvest Golf Club will begin its annual fall aeration program. On that day, the golf course will close for play at noon. On October 11th and 12th, Golf Course, Practice Facility & Masa's Grill will be closed both days. The golf shop will remain open 9 - 4 pm.

The annual fall aeration program is a critical and necessary process performed by all golf courses. Ideally, holo core aeration should be performed in September to optimize recovery opportunities. However, THGC elects to perform this disruptive program in the middle of October to minimize disruption to members and guests alike.

Historically, September is one of the season's nicest and most popular months. Because of the later dates selected, evidence of aeration will show when opening the golf course in the spring (the anticipated opening day, March 17th, 2023), as recovery is considerably slower to nonexistent when performed at that time of the year. Despite this invasive process, the golf course will remain highly playable until the season's final day ( October 23rd).

Preceding holo core aeration fairway verticut & mowing will be occurring. Given the vast surface of our fairways ( 1 million sq feet), an average of two fairways per day will

receive this treatment, with the entire process expected to take two weeks to complete leading up to the start of aeration.

We want to take this opportunity to thank you for your understanding and support during the critical period of the season.
