Maintenance Projects

Bunkers

The reintroduction of sand to the six bunkers on the course (holes #1,2 & 16) was completed earlier this week. These bunkers are now filled with sand and are ready to be reintroduced into regular play. Thank you for your patience and understanding during this maintenance project.

Sodding

The recent flooding that has affected the lower mainland has destroyed the sod THGC had ordered to fill the sand patches scattered around the golf course. With this sod destroyed, it has delayed getting these areas covered. The Maintenance Team has been busy at work to try and locate a replacement source of sod to continue forward with this project.
